Continental Matador Rubber/ Technology Center Púchov is looking for candidate (m/f) for position:

Test method development engineer

(Job ID:48977BR)

Description

- > Development and industrialization of physical test methods based on customer requests and priority in R&D labs
- > Adjustment or modification of existing test methods based on the knowledge on internal or external test procedures
- > Industrialization and implementation of newly acquired testing equipments into laboratory management systems
- > Technical support of existing Lab Information Systems (LIMS), test equipments and software as well as support of laboratories in daily business
- > Software development based on customer requirements for optimization of processes in material testing laboratory
- > Internal and external customer support with regard to testing equipments and software systems
- > Initiation and evaluation of non-standard and special tests
- > Evaluation and interpretation of test results and test concepts

Requirements

- > Education as a physicist, engineer, information/computer scientist (MSc, PhD)
- > 2-3 years of experience in the similar area is an advantage
- > Basic knowledge about C#, HTML/CSS/JavaScript/MVC
- > Higher user of MS Office & VBA programming
- > Analytical thinking, independent working style
- > Strong communication skills

What we offer

- > Attractive salary and benefit structure
- > Flexible working time
- > Interesting projects and tasks
- > Diverse and multicultural working conditions
- > Business travel opportunities
- > Thorough induction training and career development
