1. Definition of the study field of habilitation proceeding and inauguration proceeding

- Name of the higher education institution: [Alexander Dubček University of Trenčín](#)
- Address of the higher education institution: [Študentská 2, 911 50 Trenčín](#)
- Identification number of the higher education institution: [719000000](#)
- Name of the faculty: [Faculty of Industrial Technologies in Púchov](#)
- Address of the faculty: [I. Krasku 491/30, 020 01 Púchov](#)
- Name of the field of habilitation proceeding and inauguration proceeding: [Materials](#)
- Content definition:

The content definition of the field of habilitation proceedings and inauguration proceedings Materials is in direct relation to the study field Mechanical Engineering, to which it is assigned. The faculty carries out long-term and continuous creative activity in the field of habilitation proceedings and inaugural proceedings Materials. The focal areas in the field of habilitation proceedings and inaugural proceedings can be defined as follows:

- **The field of metals and physical engineering of materials** focused on:
 - research of macro- and microstructure of metallic materials, non-metallic materials and composites,
 - study of the structure and defects of materials and products,
 - diagnostics of mechanical properties and material characteristics,
 - development of diagnostic methods for evaluating the properties of materials and composites.
- **The field of computational modelling** focused on:
 - application of FEM for solving deformation-stress states of products,
 - analysis of temperature fields, determination of service life of products,
 - static, kinematic and dynamic analysis of systems.
- **The field of polymeric materials** focused on:
 - development and modification of the composition of polymeric materials with a rubber matrix,
 - preparation and characterization of alternative additives and their application to polymeric materials,
 - development of polymer composite systems with specific properties and their application in practice,
 - chemical and physical modifications of natural and synthetic polymers.
- **The field of inorganic materials** focused on:
 - research of the relationships between the properties of inorganic materials and their composition,

- development of new types of inorganic materials according to the requirements of practice,
 - research in the field of sol-gel methods (thin films, composites),
 - modification of the composition of natural inorganic materials.
 - **The field of environmental engineering** focused on:
 - procedures for greening the production and composition of materials and composites,
 - research in the field of alternative raw materials based on selected types of industrial waste and their material applications,
 - evaluation of the impact of industrial technologies on the environment and development of progressive materials focused on the elimination of pollutants from the environment.
 - **The field of textile materials** focused on:
 - research of the relationships between the properties of textile fibers and technical textile materials and their applications in industry,
 - study of the influence of material structure on physiology and comfort,
 - research and development of biodegradable textile materials,
 - study of integrated textiles and their applications.
 - **The field of industrial design** focused on:
 - design proposals of components and systems.
- Awarded degree: doc./ prof.
 - Assignment to field(s) of study: [36. Mechanical Engineering](#)

2. Personnel responsible for the study field of the habilitation proceeding and the inauguration proceeding

- Persons responsible for the habilitation proceeding and inauguration proceeding
 - prof. Ing. Darina Ondrušová, PhD.
 - prof. RNDr. Mariana Pajtášová, PhD.
 - doc. Ing. Jan Krmela, PhD.
 - doc. Mgr. Ivan Kopal, PhD.
 - doc. Ing. Vladimíra Krmelová, PhD.

Reference to the persons responsible for the habilitation proceeding and inauguration proceeding with their publication:
